IBC Rental Guide

Why Rent IBCs? 3 Key Benefits of Renting Vs. Owning

It's a common industry challenge — your production levels spike or rush orders arrive. Suddenly, you need additional intermediate bulk containers (IBCs) to transport your liquids, and you need them NOW!

Renting Offers 3 Key Benefits Over Owning:

Quality, Convenience, and Value

How can you boost your IBC inventory without breaking the bank?

Look to Metano and our IBC Rental Program to expand your stainless steel IBC fleet! Unlike purchasing, a flexible IBC rental plan lets you quickly access the **stainless steel IBC storage** you need without a large investment or long-term commitment. **You simply order the tanks you need, keep them as long as necessary, and return them when you're done.** No need to worry about expensive disposal costs or management of obsolete equipment. Instead, you can expand-on-demand at a low-daily rate — and reserve your capital for other expenditures.

Plus, when you rent from Metano, you'll receive stainless steel IBCs that are clean, certified and ready-to-fill. We'll deliver them to your door, and as a full provider of **IBC accessories**, we can even source any parts you may need, including mixers, stands, gauges and more.

IBC Rentals

Why Rent Stainless Steel IBCs? 3 Key Benefits:

1. Quality

- Superior stainless tanks – delivered clean and ready-to-fill
- Simple, easy-access design – to save time in processing
- Large storage capacity – store more liquids in fewer containers (as compared to drums)
- Clean and certified – for high-purity application

2. Convenience

- Easy ordering – one quick call
- Fast delivery – to help you keep your deadlines
- Certified containers ready to fill – UN/DOT certified
- No long-term commitment required – or order minimum or maximum

3. Value

- Low daily rental rates – with flexible terms
- No large capital outlay – Opex vs. Capex
- Flexible financing – to meet your budget goals
- Better inventory control – with improved asset allocation

Metano's Stainless Steel IBCs Feature:

- The same liquid capacity as 6 standard drums
- Ten-gauge construction for durability
- Sloped bottom for complete product drainage
- Standard base size for easy stacking and moving
- UN and DOT certification

IBC Rental Solves Production Challenges

Challenge:

A major producer of consumer products contacted us when they won the bid to manufacture a brand new fragrance line. They needed 32 stainless steel IBCs immediately to kick-start production and meet tight shipping deadlines. But unsure if this would be a lasting business segment, they did not want to commit tight capital to a long-term purchase. And they wanted to avoid the hassle of cleaning and tracking new IBC inventory.

Solution:

Just 24 hours after receiving the call, our team customized a flexible IBC rental plan and delivered the stainless steel tanks to their production floor. The tanks were clean, certified and ready-to-fill, which gave our partner a jump on production and delivery. And best of all, our partner realized a significant savings by renting, instead of owning the IBCs. At a value of just \$1.50 per tank/per day for a six-month timeframe, they had the tanks they needed, without the need to manage excess inventory.
